

Application No.: 10/783,107
Preliminary amendment dated: May 20, 2004

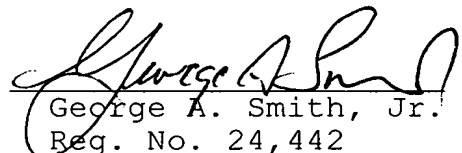

REMARKS/ARGUMENTS

This preliminary amendment is presented in order to correct a typographical error which was inadvertently overlooked, namely the printing of a colon (:) instead of the symbol μ , which is the Greek letter mu, standing for "micro," meaning $\times 10^{-6}$, or "micron," meaning 10^{-6} meters.

This amendment does not introduce new matter. It would be understood by a person skilled in the art that the thicknesses referred to in paragraphs 0039 and 0074 were intended to be expressed in microns. Moreover, in the data in column 3 of the table in FIG. 12, which correspond to the data in paragraph 0074, 25μ is used instead of $25:$. Thus, the fact that the symbol ":" should be " μ " would be readily apparent even to one lacking skill in the art.

Respectfully submitted,
HOWSON & HOWSON
